

UTILITY CHARGER

Infinity Utility Chargers are the most energy efficient industrial battery chargers on the market. Developed from the ground up to eliminate waste of energy, materials, and battery life, Stanbury chargers consistently outperform the competition in independent tests of energy efficiency. With over 20 years experience building high frequency battery chargers for industrial applications, nobody in the industry can match our functionality, quality, reliability, or ability to effectively support HF chargers.

Energy Efficient

Leading Power Factor

Versatile Profile

Smooth DC Output

Minimal Demand

No Moving Parts

Reliable Connections

Proven Design
